

SPECIFICATIONS

DISPLAY

Liquid crystal display with backlight

1 line, 4 digits and 2 line, 7 digits per line to show electrical Parameters

LCD INDICATIONS

MD - Maximum Demand of Power

- Communication in progress

LED INDICATIONS

INT - Integration of energy

WIRING INPUT

3 Ø - 4 wire, 1 Ø - 2 wire

RATED INPUT VOLTAGE

60 to 300V AC (L-N);

104 to 520V AC (L-L)

FREQUENCY RANGE

45-65 Hz

NO OF CHANNEL

3 Ø - 2 Channel, 1 Ø - 6 Channel (Selectable)

CT PRIMARY L1 and CT PRIMARY L2

5A to 10,000A (Programmable for any Value)

CT SECONDARY

330mV

PT PRIMARY

100V to 10kV (Programmable for any value)

PT SECONDARY

100 to 500V AC (L-L)(Programmable for any value)

DISPLAY UPDATE TIME

1sec for all parameters

POWER CONSUMPTION

Less than 8VA

ENVIRONMENTAL CONDITIONS

- Indoor use

- Altitude of up to 2000 meters

- Pollution degree II

Temperature : Operating : -10°C to 55°C

Storage : -20°C to 75°C

Humidity : Up to 85% non-condensing

MOUNTING: Din Rail mounting

WEIGHT

MRJ4M-SL: 200gms.

Pulse Output: Voltage range: 24V DC max.

Current capacity: 100mA max.

Pulse Duration: Selectable between 0.1 to 2.0sec.

Pulse Weight: Selectable between 0.01 to 9.99kWh

ORDER CODE INFORMATION			
Product Supply C		Certification	
	Self Supplied(V1,N)	C€	
MRJ4M-SL	60 to 300V AC, 50 / 60Hz, (±5%)	•	
Installation Category III			

SERIAL COMMUNICATION			
Interface standard and protocol	RS485 AND MODBUS RTU		
Communication address	1 to 255		
Transmission Half duplex			
Data types	Float and Integer		
Transmission distance	500 Metre maximum		
Transmission speed	300, 600,1200, 2400, 4800, 9600,19200 (in bps)		
Parity None, Odd, Even			
Stop bits	1 or 2		
Response time	100ms (max and independent of baud rate)		

RESOLUTION		
PT Ratio x CT Ratio	kWh	INT
<15	0.01K	0.001K
<150	0.1K	0.01K
<1500	1K	0.1K
<15000	0.01M	1K
<150000	0.1M	0.01M

NOTE: 1) For Voltage, Current, Power, resolution is automatically adjusted

2) For power factor, resolution is 0.01

3) The total energy is highest resolution of loads

ACCURACY:	
Measurement	Accuracy
Voltage V _{L-N}	±0.5% of full Range
Voltage V _{L-L}	±0.5% of full Range
Current	±0.5% of full Range
Frequency For L-N Voltage >20V, For L-L Voltage >35V	±0.1% of full Range
Active Power	±1% of full Range
Apparent power	±1% of full Range
Reactive Power	±1% of full Range
Power factor	±0.01 of full Range
Active energy	Class 1
Reactive energy	Class 1
MAX Active Power	±1% of full Range
MAX Apparent Power	±1% of full Range

SAFETY PRECAUTIONS

All safety related codifications, symbols and instructions that appear in this operating manual or on the equipment must be strictly followed to ensure the safety of the operating personnel as well as the instrument.

If the equipment is not used in a manner specified by the manufacturer it might impair the protection provided by the equipment.

- Do not use the equipment if there is any mechanical damage.
- · Ensure that the equipment is supplied with correct

CAUTION :

- 1. Read complete instructions prior to installation and operation of the unit.
- 2. Risk of electric shock.
- 3. The equipment in its installed state must not come in close proximity to any heating sources, oils, steam, caustic vapors or other unwanted process by products.

WIRING GUIDELINES

/ WARNING :

- 1. To prevent the risk of electric shock, power supply to the equipment must be kept OFF while doing the wiring
- 2. Wiring shall be done strictly according to the terminal layout. Confirm that all connections are correct.
- 3. Use lugged terminals.
- 4. To reduce electromagnetic interference use of wires with adequate ratings and twists of the same in equal size shall be made with shortest connections.
- 5. Layout of connecting cables shall be away from any internal EMI source.
- 6. Cable used for connection to power source, must have a cross section of 0.5mm2 to 2.5mm2 (20 to 14AWG: 75°C
- 7. Copper cable should be used (Stranded or Single core
- 8. Before attempting work on device, ensure absence of voltages using appropriate voltage detection device.

INSTALLATION GUIDELINES

/ CAUTION :

- 1. This equipment, being built-in-type, normally becomes a part of main control panel and in such case the terminals do not remain accessible to the end user after installation and internal wiring.
- 2. Conductors must not come in contact with the internal circuitry of the equipment or else it may lead to a safety hazard that may in turn endanger life or cause electrical shock to the operator.
- 3. Circuit breaker or mains switch must be installed between power source and supply terminals to facilitate power 'ON' or 'OFF' function. However this switch or breaker must be installed in a convenient position normally accessible to the operator.
- 4. The equipment shall not be installed in environmental conditions other than those mentioned in this manual.
- 5. The equipment does not have a built-in-type fuse. Installation of external fuse of rating 275V AC / 0.5Amp for electrical circuitry / battery is highly recommended.

DIMENSIONS (All dimensions in mm)

Front View

L1 needs to be included even if L2,or L3 are used for reference (6 channel & single phase)

All fuse types: 0.5A class CC UL type 0.5A fast acting 600V

CHANN	CHANNEL DESCRIPTION				
LOAD	2 CH	6 CH			
L1	1st, 2nd & 3rd phase of current 1	CH1, CH2, CH3			
L2	1st, 2nd & 3rd phase of current 2	CH4, CH5, CH6			

Doc. name: OP INST MRJ4M-SL OP386-V04(Page 1 of 4)

ONLINE PAGE DESCRIPTION

There are 2 dedicated key labeled as PAGE and PRG with symbols marked as \triangleright and \triangle to read meter parameters.

At power ON meter displays average phase to neutral voltage and active energy of three phases. If any key is not pressed for 60sec., unit resumes manual mode.

KEY PRESS	PARAMETER KEY	DESCRIPTION			
ONLINE PAGE DESCRIPTION FOR MRJ4M-SL (2CH)					
Press page (▷)	PressA	Displays line to neutral voltage of three phases Displays line to line voltage			
key	key	of three phases			
(1st time)	Press > key 3 sec.	Displays voltage sequence.			
Press page (⊳)		Displays current of three phases of load 1.			
key (2nd time)	Press A key	Displays current of three phases of load 2.			
		Displays power factor of three phases of load 1 and frequency.			
	Press A key 1st time	Displays power factor of three phases of load 2 and frequency.			
	Press ∆ key 2nd time	Displays active power of three phases of load 1.			
	Press A key 3rd time	Displays active power of three phases of load 2.

Note: All pages will be same as above for P1/P2/P3 only phase wise voltage will be display (For MRJ4M-SL only)

SERIAL NUMBER DESCRIPTION

Press ▲ key for 10sec. to display 8 digit serial number, the serial number will be displayed for 10 second

CONFIGURATION

There are 3 dedicated key with symbols marked as ▷, △ and ⇐ J. Use these 3 key to enter into configuration / change setting.

Note: The settings should be done by a professional, after going through this users manual and after having understood the application situation.

For the configuration setting mode :

- Use A and ← for 3sec. to enter or exit from config. mode.
- Use > shift key to move cursor left or right by one digit each time. After last digit of display cursor shift at 1st digit of display.
- Use A increment key for increasing the parameter value.
- Use<₽ key to save the setting and move on to next page.
- Use A and D keys to go back and to previous page.

Doc. name : OP INST MRJ4M-SL OP386-V04(Page 2 of 4)

23.05	Reset Reactive Energy -2	No / Yes	No
23.06	Reset L2 Max Power	No / Yes	No

- For resetting energy parameters user will be prompted the password. If correct password is entered, the user will be able to reset all energy parameters. This password will be value which will be greater than the configuration password by 1.
- * Valid only for 2 channel selection.
- # In configuration set primary value first and then secondary value for both CT & PT.

A CT ROTATION - IMPORTANT NOTE

Please note: All **THREE PHASE** easywire current transformers as default are configured to monitor Incoming supplies(L1 is on the right-hand side when Viewed from the P2 face). If the transformer is to be used For load monitoring(Requiring L1 to be on the Left-hand Side when viewed from the P2 face), the operator must Perform the "**To change**" procedure described below: **To change**:

We can change LHS/RHS in configuration mode only. **To check:**

Press $\ensuremath{\rightleftharpoons}$ key for 3 sec to check the CT mounting Settings.

Pulse output from MRJ4M-SL meter can be interfaced into a process through a PLC for on line control of energy content in the process.

If the PLC has a self excited digital input, external DC supply is not needed.

The kWh pulse is also used to derive average kWh information at the PLC.

- # All fuse types: 0.5A class CC UL type 0.5A fast acting 600V
- In MRJ4M-SL valid only for 2 channel selection

	30160	0xA0	kWh of CH6		
	30162	0xA2	kVArh of CH1		

Address	Hex Address	Parameter
30164	0xA4	kVArh of CH2
30166	0xA6	kVArh of CH3
30168	0xA8	kVArh of CH4
30170	0xAA	kVArh of CH5
30172	0xAC	kVArh of CH6
30174	0xAE	kW Max active power of CH1
30176	0xB0	kW Max active power of CH2
30178	0xB2	kW Max active power of CH3
30180	0xB4	kW Max active power of CH4
30182	0xB6	kW Max active power of CH5
30184	0xB8	kW Max active power of CH6
30186	0xBA	kVA Max apparent power of CH1
30188	0xBC	kVA Max apparent power of CH2
30190	0xBE	kVA Max apparent power of CH3
30192	0xC0	kVA Max apparent power of CH4
30194	0xC2	kVA Max apparent power of CH5
30196	0xC4	kVA Max apparent power of CH6
30198	0xC6	Existing kW Max active power of CH1
30200	0xC8	Existing kW Max active power of CH2
30202	0xCA	Existing kW Max active power of CH3
30204	0xCC	Existing kW Max active power of CH4
30206	0xCE	Existing kW Max active power of CH5
30208	0xD0	Existing kW Max active power of CH6
30210	0xD2	Existing kVA Max apparent power of CH1
30212	0xD4	Existing kVA Max apparent power of CH2
30214	0xD6	Existing kVA Max apparent power of CH3
30216	0xD8	Existing kVA Max apparent power of CH4
30218	0xDA	Existing kVA Max apparent power of CH5
30220	0xDC	Existing kVA Max apparent power of CH6
