**WARNING**

**⚠ WARNING :**

- Minor human hazard by electric shock and burns occasionally occur.
- Heat sink must be connected to earth in the end product.

**CAUTION**

**⚠ CAUTION :**

- Do not touch the SSR or the heat sink either while the power supply is ON or immediately after the power is turned OFF. The SSR and the heat sink may be hot.
- Do not touch the SSR main circuit terminals immediately after the power is turned Off.The internal snubber circuit is charged.
- SSR may occasionally rupture in case of short circuit. To protect against short-circuit accident, install a protective device, such as a quick-burning fuse or a circuit breaker.

**SAFETY PRECAUTIONS**

**Mounting**

- Mount SSR in the orientation such that the heat sink fins are always positioned in vertical orientation in order to ensure proper heat ventilation & do not obstruct air flow to the SSR heat sink. Air convection for SSR is necessary.

- If a material with high thermal resistance is used for heat sink,heat generated by SSR may occasionally cause fire or burning.
- When installing SSR directly into a control panel such that the panel can be used as a heat sink, use a panel material with low thermal resistance such as Aluminium / Steel.
- Tighten the SSR screws securely. Loose terminals generate abnormal heat which may result in fire.

**WIRING**

**FUSE INFORMATION**

**WIRING GUIDELINES**

- Ensure the use of proper cable sizes and not use wire with broken sheaths.
- Use cable with crimp terminals of appropriate size for terminations.
- Tighten screws to the specified torque. Re-tighten after 48 hours to minimize wire cold flow. Re-torque every 3 to 6 months.
- When tightening terminal screws ensure no non-conductive foreign matter is caught in screw.
- Be sure to conduct wiring with power supply turned off.

**TIGHTENING TORQUE**

SCREW SIZE	TIGHTENING TORQUE
M4 screws(Control Input)	1.2N-m
M5 screws (Load Output)	2.0N-m

**USAGE**

- Always use SSR within its rated specifications,otherwise malfunction, damage or fire may result.
- Select a load within the rated range.Inappropriate load may cause misoperation , trouble or burning.
- Select the power supply within the rated frequency range. Inappropriate power frequency may cause misoperation, trouble or burning.
- Use of SSR in domestic environments may cause radio interference,in this case the user may be required to employ additional mitigation methods.
